DETAILED ACTION

1. The request filed on 9-13-02 for a Continued Prosecution Application (CPA) under 37 CFR 1.53(d) based on parent Application No. 09/043,665 is acceptable and a CPA has been established. An action on the CPA follows.
2. Amendments and response filed 11-12-02 has been entered.
3. Claims 11-21 have been cancelled.
4. Claims 1, 2, 4 and 6-8 have been amended.
5. Claims 1-8 are pending and under consideration.
6. The 112 first paragraph rejection has been withdrawn in view of the argument of the applicants and their admission on record that the instantly claimed invention does not encompass senescent cells.
7. The 102 rejection has been withdrawn in view of the amendment that the growth factor is encoded by an exogenous nucleic acid.
8. The 103 rejection has been withdrawn in view of the applicants' arguments.

Claim Rejections - 35 USC § 112

9. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

10. Claims 1-8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 recites the limitation "the surface bound growth factor" in line 7. There is insufficient antecedent basis for this limitation in the claim since the claim does not recite a surface bound growth factor.

Claim 1 recites the limitation "said cells" in line 8. The antecedent basis for this limitation in the claim is indefinite because it is unclear as to which cell the term is referring to, the quiescent cell or the retroviral packaging cell.

Claim 4 is vague and indefinite because it is unclear as to which retroviral packaging cell the term "said retroviral packaging cell" refers to, the cell before expression of the growth factor or the cell after the expression of the growth factor.

Claims 5 and 6 are vague and indefinite because it is unclear as to what is meant by the term "a fusion". Use of the term "a fusion protein" is suggested.

Claim 8 is vague and indefinite because it is unclear as to which retroviral packaging cell the term "said retroviral packaging cell" refers to, the cell before expression of the growth factor or the cell after the expression of the growth factor.

11. A broad range or limitation together with a narrow range or limitation that falls within the broad range or limitation (in the same claim) is considered indefinite, since the resulting claim does not clearly set forth the metes and bounds of the patent protection desired. Note the explanation given by the Board of Patent Appeals and Interferences in *Ex parte Wu*, 10 USPQ2d 2031, 2033 (Bd. Pat. App. & Inter. 1989), as to where broad language is followed by "such as" and then narrow language. The Board stated that this can render a claim indefinite by raising a question or doubt as to whether the feature introduced by such language is (a) merely exemplary of the remainder of the claim, and therefore not required, or (b) a required feature of the claims. Note also, for example, the decisions of *Ex parte Steigewald*, 131 USPQ 74 (Bd. App. 1961); *Ex parte Hall*, 83 USPQ 38 (Bd. App. 1948); and *Ex parte Hasche*, 86 USPQ 481 (Bd. App. 1949). In the present instance, claim 6 recites the broad recitation a viral envelope protein, and claim 5 on which this claim is dependent recites a retroviral envelope protein which is the narrower statement of the range/limitation.

Applicants are advised to call the Examiner to discuss the 112 second issues and alternate language to address these issues.

12. No claim is allowed.
